

FIG. 1

```
graph TD; 200([START]) --> 210[SELECT A CONTACT]; 210 --> 220[SET TELEPHONE SERVICE FEATURES]; 220 --> 240[COMPRESS INFORMATION]; 240 --> 250[STORE IN CUSTOM FIELD]; 250 --> 260{CONTINUE?}; 260 -- YES --> 210; 260 -- NO --> 270([END]);
```

The flowchart illustrates a process for handling contact information. It begins with a 'START' terminal (200), which leads to a 'SELECT A CONTACT' process (210). From there, the flow proceeds to 'SET TELEPHONE SERVICE FEATURES' (220), then to 'COMPRESS INFORMATION' (240), and finally to 'STORE IN CUSTOM FIELD' (250). A decision diamond (260) asks 'CONTINUE?'. If the answer is 'YES', the flow loops back to the 'SELECT A CONTACT' step (210). If the answer is 'NO', the flow proceeds to the 'END' terminal (270).
